juice pack reserve micro

user manual

mophie **juice pack** reserve micro
made for smartphones & other micro USB devices

Welcome
Thank you for purchasing the mophie juice pack reserve micro. You will now be able to travel great distances; be the master of your own destiny, no longer bound by the limitations of your internal battery. Let's get juiced!

Package Contains
- mophie juice pack reserve micro
- Attached Keychain
- User Manual

Features
By integrating new elements into the design, the juice pack reserve micro is a super compact keychain with integrated charge cables so its ready for you to grab it and go!

Here's a rundown of why the juice pack is so fantastic:

1. No cables required! Flexible cable and hidden USB connector stay concealed until you're ready to charge.
2. Smart battery technology automatically turns power on when the reserve is connected to your device and turns off when disconnected.
3. Uses breakthrough rechargeable lithium polymer battery. (Much safer than those troublesome lithium-Ion batteries).
4. Track battery power status at a glance with an integrated LED power indicator. Indicates charging mode and current battery life. Know before you go!
5. Rechargeable for over 500 cycles. (These are FULL cycles. Partial cycles don't count as full. So, you can charge your juice pack 10% of the way ten times before you get to a complete cycle. Don't be afraid to top it off.)
6. Built-in short circuit, over-charge and temperature protection. Safety First!

Compatibility
The reserve has been designed principally for the latest generation of popular smartphones. Although most major smartphone manufacturers use a standard charging configuration (which this device supports) some manufacturers still insist in being different so we cannot guarantee compatibility with every phone. As always – please read through all of the warnings in this manual very carefully before using this product.

Charging your juice pack
The juice pack reserve comes with a built-in USB charging connector that stows away nicely around the sides of the housing. Connect the juice pack to your computer or any wall-plug style power source with USB out including the standard iPhone USB adaptor.

(The LED power indicator will blink red, then transition to orange, then green and will remain blinking until completely full. The LEDs located on the top of the device will blink when charging, after 30 seconds the lights will turn off. Press the status indicator before you disconnect to make sure you are fully charged.)

Charging your device using the juice pack
Connect your device with the reserve micro's integrated micro USB connector. Make sure that the micro USB tip is securely connected to your device. When charging most smartphones, a charging indicator will appear on the screen and you will hear a chirp from the device.

Checking the status of the juice pack
You can check the amount of juice your reserve has by pressing the button on the side of the device. There is a single LED on the reserve that illuminates when the juice pack has a charge.

The LED's will light to show battery charge level as follows:
Green: Full charge
Orange: Half charge
Red: Low charge
No LED: Connect to power

To keep your juice pack operating to its fullest potential, make sure to do the following:

1. Keep your juice pack dry and away from moisture and corrosive materials.
2. Do not wash the juice pack with harsh chemicals, soaps or detergents. Just wipe the case with a soft, water-dampened cloth. Wipe the pins gently with a soft, dry cloth.
3. Re-charge your juice pack once every three months when not in use, and remember to charge it for one hour before putting it away the first time.

Warranty
At mophie, we are dedicated to making the best quality products we can. To back this up, your mophie juice pack is warranted for 1 full year from the date of purchase (this warranty does not affect any statutory rights that you may be entitled to). Keep a copy of your purchase receipt as proof of purchase. Be sure to register your product at mophie.com to activate it and check for the latest product updates as they develop. Failure to register your product or to provide proof of purchase may void the warranty.

FAQ

Will the juice pack reserve charge my tablet?
Not recommended. We suggest mophie's juice pack powerstation for charging tablet devices.

How do I know if my juice pack reserve needs to be recharged?
If you press the power indicator button and the LED on the top of the device does not illuminate, its time to connect to power. This LED will blink until the device is fully recharged.

What are the best methods for charging my juice pack reserve?
Connect the mophie juice pack reserve to a compatible power source using the built-in USB charge cable. The USB cable can be plugged in to your computer or any wall-plug style power source with USB out.

Why aren't the LEDs blinking while the juice pack is charging?

After connecting to a power source, the LED status indicator will start blinking to indicate charging. The lights will turn off after 30 seconds allowing for a good night's rest. Remember to check the status indicator before you disconnect to make sure you are fully charged.

How many charge cycles do you get in the juice pack reserve?

The juice pack reserve is rechargeable for over 500 cycles (These are full cycles. Partial cycles don't count as full. So, you can charge your juice pack 10% of the way 10 times before it counts as a complete cycle.) Don't be afraid to top it off!

What is mophie's return policy?

mophie reserves the right to claim a 20% restocking fee upon return. (For a full "Return Policy", please go to mophie.com)

Warning

Read all instructions and warnings prior to using this product. Improper use of this product may result in product damage, excess heat, toxic fumes, fire or explosion, for which damages you ("Purchaser"), and not mophie, LLC ("Manufacturer") are responsible.

- The reserve micro should be operated only in open-air conditions. It should not be operated in an enclosed, unventilated space such as a carrying bag, pocket, or purse. Failure to follow these instructions may cause damage to the reserve micro by overheating.
- Do not store battery in high temperature environment, including intense sunlight heat. Do not place battery in fire or other excessively hot environments.
- Be cautious of excessive drops, bumps, abrasions or other impacts to this battery. If there is any damage to the battery such as dents, punctures, tears, deformities or corrosion, due to any cause, discontinue use and contact manufacturer or dispose of it in an appropriate manner at your local battery recycling center.
- Do not disassemble this battery or attempt to re-purpose or modify it in any manner.
- Do not expose this battery to moisture or submerge it in liquid. Keep battery dry at all times.
- Do not attempt to charge battery using any method, apparatus or connection other than the device's USB connector. For questions or instructions for the various ways to charge the juice pack refer to this manual's "Charging your device using the juice pack" and "use summary" sections.
- Do not attempt to replace any part of this battery.
- If this battery is intended by Purchaser to be used by a minor, purchasing adult agrees to provide detailed instructions and warnings to any minor prior to use. Failure to do so is sole responsibility of purchaser, who agrees to indemnify Manufacturer for any unintended use/misuse by a minor.
- All batteries have gone through a thorough quality assurance inspection. If you find that your battery is excessively hot, is emitting odor, is deformed, abrased, cut or is experiencing or demonstrating an abnormal phenomenon, immediately stop all battery use and contact Manufacturer.
- For extended storage, first charge your battery for one hour.
- Never dispose of batteries in the garbage. Disposal of batteries in the garbage is unlawful under state and federal environmental laws and regulations. Always take used batteries to your local battery-recycling center.

Legal

This Battery is meant for use only in conjunction with Micro USB equipped mobile devices. Please consult your device packaging to determine whether Micro USB chargers are compatible with your particular mobile device.

Manufacturer shall not in any way be liable to you or to any third party for any damages you or any third party may suffer as a result of use, intended or unintended, or misuse of this battery in conjunction with any device or accessory other than the appropriate mobile device for which this battery is designed. Manufacturer will not be responsible for any damages you or any third party may suffer as a result of misuse of this battery as outlined above. If you are responsible for battery use with an unintended mobile device and damages result from such use, you agree to indemnify Manufacturer for any resulting injuries to any third part(ies). mophie, mophie juice pack reserve and the mophie logo are registered in the U.S. Patent and Trademark Office and are registered and pending in other countries. Patents pending in U.S. and other countries. iPod, iPhone and iPad are trademarks of Apple Inc., registered in the U.S. and other countries. All rights reserved.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced technician for help.

CAUTION: To comply with the limits of the Class B digital device, pursuant to Part 15 of the FCC Rules, this device is comply with Class B limits. All peripherals must be shielded and grounded. Operation with non-certified peripherals or non-shielded cables may result in interference to radio or reception.

MODIFICATION: Any changes or modifications of this device could void the warranty.
